Cathy Mulrow-Peattie is a seasoned attorney who counsels clients on artificial intelligence (AI), privacy, cybersecurity, digital media, advertising, marketing, ad tech and e-commerce issues. She leverages her extensive background as an in-house and general counsel at Fortune 500 companies, an advertising agency, an ad tech startup, and software companies to help her clients develop solutions to regulatory compliance issues.

Cathy focuses her practice on two areas: proactive and reactive artificial intelligence, privacy and cybersecurity counseling, and advertising and marketing regulatory compliance. For her artificial intelligence, privacy, and cybersecurity counseling practice, Cathy develops client-centric solutions focused on:

- technology and data strategy
- governance policies and data mapping
- risk assessments and risk quantification
- supply chain
- service provider/processor/third-party management
- privacy and security by design processes
- consumer, business to business and employee transparent notices and policies
- data minimization, privacy and security enhancing technologies, and data retention
- AI, privacy, and cybersecurity training and audits
- regulatory tracking and guidance

Cathy also counsels on the Federal Trade Commission's (FTC) Safeguard Rules, New York State Department of Financial Services (NYDFS) cybersecurity regulatory requirements, cybersecurity governance and remediation, and incident response issues. Given her deep background in advertising and financial services, Cathy provides practical guidance to her clients on subscription-based advertising, FTC Endorsement and Testimonial Guidelines, deceptive marketing, and payment system compliance/fraud issues.
